

Sea Turtle Reminders

Only use **RED** flashlights. Red is wildlife friendly.

White lights will disorient hatchlings often leading them the wrong way & can deter females from nesting on our shores.

Knock your sand castles down when leaving.

Sand castles become obstacles for small hatchlings. This can lead to disorientation or predation. Sea turtles like a flat beach!

Fill in your holes.

Holes can become deadly traps very quickly for females and hatchlings. **Always** fill in any hole you create while enjoying the beach.

Leave No Trace.

Leave nothing behind. Take only the essentials. Left litter, chairs, tents, and more will not only entangle sea turtles but block them from reaching the water or their nesting sites.
